

NATURE TRAILS

Rush Pond Way is a 2.6-mile pathway through the heart of the Rush Pond wetlands and is the culmination of over ten years of work by Councilman John Strough. This important byway links the Gurney Lane Recreation Area from the north to the many neighborhoods within the Aviation Road corridor as well as the Queensbury School campus and its trail system. Along the way, trail users will cross three hand-constructed bridges and will have many opportunities to explore the natural beauty of the Rush Pond wetlands. The largest bridge — located on the south end of the trail — offers scenic views of the wetlands to the north and the stream life as it flows south toward Aviation Road.
